Morpho - Bug #355

show icon indicating presence of data in package list

11/30/2001 04:47 PM - Matt Jones

Description

Current icons in the resultpanel show whether or not a file is local, or is on metacat. Need to also show whether or not the package actually contains data (versus metadata only).

History

#1 - 12/08/2001 12:10 AM - Matt Jones

DONE. The Morpho result panel now displays one of 6 icons (instead of 3 before). Those icons indicate that the package is in one of the following six states:

```
S T O R A G E    L O C A T I O N
                  local        metacat       both
metadata only       X             X            X
metadata and data   X             X            X
```

These icons and their states need to be described in the HTML documentation that is part of the tutorial. The icons themselves can be very simply changed if we want a different look to the interface, but for now these are it! Check out and build morpho from CVS to see the new look.
