Description

As an example, select a currently existing rectangle. Then, click and drag the scrollbar.

The scrollbar doesn't immediately receive the event. Likely in the code that cancels the selection, the event is not redispatched to the object it occurred on.

History

#1 - 10/29/2008 07:19 PM - Ryan McFall

This was resolved by ensuring that events are redispatched in the RectangleSelected mouse listener.
