#### Description

On the vector rasterization page, using the BS 110 sample exam, if we select the image on page 5 and then move to page 7 and put the mouse cursor where the image from page 5 was being drawn, the cursor changes to a Move cursor, even though it shouldn't.

It's likely that we just need to listen to page change events from the PDF pane and clear the selector when this happens.

#### History

##### #1 - 11/09/2008 11:10 AM - Ryan McFall

Seems to have been fixed by most recent changes to Selector
