Description

Seeing a new issue with ProvenanceRecorder. It seems to be occurring with both schemas v7 and v8. I've not narrowed it down yet, so for now, to reproduce:
- open usecases/terrestrial/workflows/derivedMETProducts/growingDegreeDays.xml
- instantiate a prov recorder, change recording type to v7
- run wf

My initial error is:
ERROR recording value change: Want not insert entity .growingDegreeDays.Baskett   Slough Wildlife Refuge DataTurbine._icon but no type given.

You'll want to first change the days wf portParam to be 2 instead of 145, so it finishes more quickly.

#2 - 04/21/2009 09:50 AM - Daniel Crawl

I fixed this in r16612: unregister listeners when changing recording types.
