Blocked by Kepler - Bug #3666: Create RIO schema	**Resolved**	**11/13/2008**

History

#1 - 11/12/2008 12:04 PM - debi staggs

ReportObjectModel is referred to as ROML
ReportInstanceModel is referred to as RIO

#2 - 11/14/2008 12:51 PM - debi staggs

This should be a JAVA model that knows how to serialize and de-serialize and we also need to define the serialization syntax for it.

#3 - 11/20/2008 12:38 PM - debi staggs

Created the Report Object class based on the initial Reporting requirements.

#4 - 11/20/2008 12:40 PM - debi staggs

Decided to keep this bug open to allow for additions or changes.

#5 - 05/19/2009 11:09 AM - debi staggs

The object models for the report object (ROML) and the Report Instance (RIO)
have both been created.
