| <b>Description</b>                                                                                  |                |                        |            |
| Make sure the ldap administrator field is not empty and contains a valid user during configuration. |                |                        |            |

### History

#### #1 - 11/10/2008 04:31 PM - Michael Daigle

Added javascript validation to make sure all fields are populated on ldap config screen.

Added validation in the admin tool to make sure that all admins entered in the configuration exist in ldap.

#### #2 - 03/27/2013 02:24 PM - Redmine Admin

Original Bugzilla ID was 3616
