

FIRST - Bug #3624

Show details about active selection in SelectIndividualText

11/11/2008 06:55 AM - Ryan McFall

Status:	New	Start date:	11/11/2008
Priority:	Normal	Due date:

Target version:	post-clientprototype	Spent time:	0.00 hour
Bugzilla-Id:	3624		
Description			
Right now the notion of the current selection tool and information about the active selection are combined.			
I think it would be better to have the "toolbar" containing selection tools at the top of this page, along with the "ignore this page" button. Then information about the active selection could be shown where the current tools are, allowing the type to be changed, and to give more information about the selection (such as the pattern for a pattern selection). In this case, we can use a combo box to display the type of selection in order to minimize the space required.			
Some feedback from team members on this one would be helpful.			

History

#1 - 02/24/2009 06:01 AM - Ryan McFall

Not crucial for completion by alpha3.

#2 - 09/30/2009 10:50 AM - Ryan McFall

This aspect of the functionality does not need to be completed for a useful prototype, so I am changing this to the post-prototype milestone
