Target version:	3.X.Y	Spent time:	0.00 hour
Bugzilla-Id:	3631		

Description

Create a diagram of the interactions between the workflow execution Scheduler and the Reporting engine.

- Scheduler doesn't exist yet.
- The scheduler relies on the remote execution of workflows.
- The scheduler should allow workflow execution to be scheduled to be run hourly, weekly, monthly, quarterly, yearly, etc.
- T.B.D. whether scheduling occurs from GUI or web interface.
