Target version:	SanParksRelease		**Spent time:**	0.00 hour
Bugzilla-Id:	3637			

Description

The following report design features should be included in stage 1.

Titles
Subtitles
Sections
Legends
Single sequence layout using relative positioning.
Support for scalar, array, 2D matrix, table, and image types.
Ability to reorder the report items (drag and drop and/or arrows)
Iconic representation of the type of item (if known).
Ability to drag and drop report items onto report.

History

#1 - 06/03/2009 03:39 PM - debi staggs

The following design features have been completed:
Ability to add:
Titles
Subtitles
Sections
Legends (will be accommodated by 'labels' which is it's own separate bug.)
Single sequence layout.
Support for static images, and also any dynamic report item types that are generated when the workflow is run.
The ability to re-order the item sequence via drag and drop.
Iconic representation of the items.
Ability to drag and drop items onto a report.
