Has duplicate Kepler - Bug #3636: Support multiple Report formats		Resolved	11/12/2008

History

#1 - 11/13/2008 10:14 AM - ben leinfelder

Some key considerations:

~~Where are images housed and referenced in the HTML case~~

~~Styling (CSS) for HTML needs to be specified (beginning in the ROML and cascading down: ROML->RIO->HTML)~~

-PDF is "easier" in the sense that the images can be looked up from provenance, embedded in the document and forgotten about (not essential to export them)

#2 - 01/22/2009 02:58 PM - ben leinfelder

This is essentially done. Using FOP for most of it; a little vanilla xsl to get the html.

Consolidating this into [#3636](#)
