Bugzilla-Id:	366			

Description

Need to reconfigure o=lter LDAP server to support SSL, also implement Hashed password for
password creation.

History

#1 - 02/12/2002 05:53 PM - David Blankman

LDAP server with SSL installed.
Fixed all problems with password synchronization between
o=lter ldap server and LTER personnel database.

Tested new user creation
Tested case when
lter user updates password.

In all of these cases, the password stored in the personnel
database, the password emailed to the user, and the password entered into the ldap server are
identical.

#2 - 08/27/2002 10:13 AM - David Blankman

The o=lter LDAP tree has been installed and tested.
