<b>Bugzilla-Id:</b>	3663		
<b>Description</b>			
Dragging images from the questions back onto the image pane doesn't seem like the most intuitive means of removing images.			
At the least, we should put a label with instructions above the image pane, telling people how to add/remove images.			

### History

#### #1 - 02/24/2009 06:00 AM - Ryan McFall

This is completed through the introduction of a remove button; right now there are potentially a few layout issues that still need to be resolved, which is why this bug is left at Assigned, rather than Fixed.

#### #2 - 05/01/2009 05:11 AM - Ryan McFall

For now this is sufficiently solved. For the post client prototype stage, it would be nice to complete the pop-up menu functionality so that can be used to remove images as well. Right now it's not there because making a pop-up menu on the image means that the pop-up menu for the QuestionComponent is not shown, which seems to be somewhat confusing. A mechanism is needed to augment the parent's pop-up menu.
