FIRST - Bug #3664

Allow exception pages for header/footer selections

11/13/2008 04:06 AM - Ryan McFall

Description

When the user deletes a selection of type header/footer, we should ask them whether they want to delete it on all pages, or just on that page.

This means we'll need to store an exception list, or to convert the header footer selection into individual selections. The second is probably easier to write, but potentially more annoying to the user if they subsequently want to delete all of the headers/footers.

History
