Target version:	client-alpha3		**Spent time:**	0.00 hour
Bugzilla-Id:	3674			

Description

I selected and mapped an external file for the responses, but it did not end up in the data table after the wizard finished.

History

#1 - 11/17/2008 10:41 AM - ben leinfelder

It appears that the assignment of the file happens with the student's real (unencrypted) ID, but then when the external file is looked up later (for serializing the data file), the student ID has been encrypted and no file assignment is found

#2 - 11/17/2008 11:12 AM - ben leinfelder

used the unecrypted ID to look up the file mapping

#3 - 03/27/2013 02:24 PM - Redmine Admin

Original Bugzilla ID was 3674
