

Metacat - Bug #3690

Errors in {qformat}.properties.metadata.xml prevent successful startup

11/25/2008 04:38 PM - ben leinfelder

Status:	Resolved	Start date:	11/25/2008

Bugzilla-Id:	3690		

Description

the lter and ltss skins had some <config> elements commented out when they were committed today - this caused an error during initial Metacat start up (for Aaron and I).

Is there any way we can make it so that a wonky skin does not bring down the entire application?

Note: I've committed the lter and ltss files to SVN so that it works.

History

#1 - 12/08/2008 03:54 PM - Michael Daigle

Informed Ben that he needed to update the utilities module. He did so and reverted his changes and it worked.

#2 - 03/27/2013 02:24 PM - Redmine Admin

Original Bugzilla ID was 3690
