Bugzilla-Id:	3702		
Description			
Currently when morpho upload a data file, it is used the file name under profile dir. This will end up that metacat will save the file name, e.g. 3.1, 4.3, as docname in xml_documents. It cause issue for metacat download data file name display (see bug 2566). We should use object name to replace the file name in profile.			

History

#1 - 12/24/2008 01:58 PM - Jing Tao

In serializeData method of AbstractDataPackage class, we pass object name to DataStoreInterface. Now it save save the data file name to metacat.

#2 - 08/12/2009 03:52 PM - Jing Tao

move to 1.7
