Description

I followed the instruction on Mike's email to install metacat in naples.nceas.ucsb.edu, which is a 64-bit machine:

To try it out, edit /etc/apt/sources.list and add the following two lines (or set it up in the Software Sources GUI):

```
deb-src http://indus.msi.ucsb.edu/apt sid main contrib non-free
deb http://indus.msi.ucsb.edu/apt sid main contrib non-free
```

Then refresh apt-get by typing

```
sudo apt-get update
```

Now type

```
apt-get install metacat
```

However, when i ran "sudo apt-get update" and i got the error:

W: Failed to fetch <http://indus.msi.ucsb.edu/apt/dists/sid/main/binary-amd64/Packages.gz> 404 Not Found

W: Failed to fetch <http://indus.msi.ucsb.edu/apt/dists/sid/contrib/binary-amd64/Packages.gz> 404 Not Found

W: Failed to fetch <http://indus.msi.ucsb.edu/apt/dists/sid/non-free/binary-amd64/Packages.gz> 404 Not Found
