

FIRST - Bug #3716

Selected rectangle can have its origin moved above the top of the document

12/29/2008 04:20 AM - Ryan McFall

Status:	In Progress	Start date:	12/29/2008

Bugzilla-Id:	3716		
Description When moving a selected rectangle, the top of the rectangle is allowed to be moved so that it has a negative coordinate. This should be disallowed. It's likely that the same problem exists when the rectangle is moved left and right.

Need to verify that this is still a bug with new selector code, but if so, it should be fixed. (Resubmit after fire)

#2 - 09/30/2009 11:03 AM - Ryan McFall

This does seem to still be a problem, but I don't see this functionality as a problem for a successful prototype.
