

Kepler - Bug #3722

parameters cannot be dragged onto the canvas

01/05/2009 03:13 PM - Derik Barseghian

Status:	Resolved	Start date:	01/05/2009
Priority:	Normal	Due date:	
Assignee:	Chad Berkley	% Done:	0%
Category:	general	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	3722		
Description			
<p>Parameters can no longer be dragged onto the canvas, they don't appear. This happens in kepler r16214 with ptil r51938. Crawl also notes it happens with an old version of kepler from before the repository change to the new build system with ptil 51994, so it may be a recent change to ptil that's causing this problem. He notes the problem does not occur in ptil vergil.</p>			

History

#1 - 01/05/2009 03:23 PM - Derik Barseghian

The Provenance Recorder also doesn't appear when dragged onto canvas.

#2 - 01/05/2009 03:36 PM - Matt Jones

Chances are this is an artifact related to one of the exp files not being in sync with the ptolemy repository. When Ptolemy updates something fundamental in one of our exp files, we at times can still compile but get unexpected behavior. I'd check for recent changes in exp files, particularly under ptolemy.vergil.*.

#3 - 01/07/2009 04:12 PM - Derik Barseghian

This has been fixed, probably by one of Christopher's ptil checkins, perhaps the same that fixed bug 3723.
