

EML - Bug #373

Incorrect Citation reference (citeinfo) in eml-coverage, temporalCov and taxonomicCov

12/11/2001 10:43 PM - Chris Jones

Status:	Resolved	Start date:	12/11/2001
Priority:	Normal	Due date:

Category:	eml - general bugs	Estimated time:	0.00 hour
Target version:	Beta7	Spent time:	0.00 hour
Bugzilla-Id:	373		
Description The geolcit, classcit, and idref elements in eml-coverage.xsd use a complex type consisting of one element reference in a sequence. The reference is to the citeinfo element, which is a single element defined in eml-coverage.xsd (with no documentation). This element ref needs to be changed to point to an eml literature citation field. Most likely, we would have to import citation into eml-coverage for this to work appropriately.			

History

Chnaging target milestone for the major EML bugs to Beta7, which is scheduled for early to mid March for release. There are likely other bugs that need to be entered and resolved for this Beta7 release as well, so lets generate a complete list!

#2 - 04/22/2002 05:42 AM - Chris Jones

I imported eml-literature and used cit:citation to replace citeinfo.
