History

#1 - 04/03/2009 01:42 PM - Chad Berkley

Make sure all demos work with the 2.0 release. Some demos that have dependencies on non-standard modules may need to be moved to their respective module.

#2 - 04/22/2009 03:30 PM - Chad Berkley

make sure all demos work with the new installer.

#3 - 06/03/2009 02:24 PM - Chad Berkley

checked and fixed all of the demos in outreach/resources/demos/getting-started

#4 - 06/03/2009 02:49 PM - Chad Berkley

Checked and fixed all workflows in outreach/resources/demos. Some in the demos/ENM directory do not work, but failures are due to external resources such as Darwin Core data. The workflows in the ENM directory should probably be reduced to a couple full workflows instead of the 15-20 test workflows that are currently in there. It is confusing which workflow actually runs the ENM processing.

#5 - 06/03/2009 03:37 PM - Chad Berkley

moved the smaller test garp workflows into a test-workflow subdir of ENM. This separates out the main ENM workflows that we expect to work as demos. All workflows in demos now work so I'm closing this bug.
