

Metacat - Bug #3742

Improve UI for selecting projects for NCEAS skin

01/12/2009 01:28 PM - Shaun Walbridge

Status:	New	Start date:	01/12/2009
Priority:	Normal	Due date:

Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	3742		
Description			
The existing UI for the NCEAS project listing is difficult to use, it contains (as of this writing) 539 projects and only displays 5 at a time. This would be easily remedied by using an autocomplete form, hopefully using one of the existing JS frameworks embedded in Metacat. This list is short and could be stored in memory clientside for improved performance.
