

Metacat - Bug #3752

New skins cause metacat to fail if all configuration files do not exist

01/14/2009 03:05 PM - Michael Daigle

Status:	Resolved	Start date:	01/14/2009

Target version:	1.9	Spent time:	0.00 hour
Bugzilla-Id:	3752		

Description

When a skin is added to the code and to the skins list in metacat.properties, it will cause metacat to fail at startup if the configuration files are not exactly right.

It should throw an error message and bypass the skin, and allow metacat to start up.

History

#1 - 01/19/2009 12:18 PM - Michael Daigle

Changed SkinsAdmin to allow Metacat to start up even if certain skins are in metacat.properties but not structured correctly in the skins directory.

Metacat will only allow for configuration of skins that are structured correctly.
