

Metacat - Bug #3776

LTER logged in link is broken

01/26/2009 11:23 AM - Michael Daigle

Status:	Resolved	Start date:	01/26/2009
Priority:	Normal	Due date:	
Assignee:	Michael Daigle	% Done:	0%
Category:	metacat	Estimated time:	0.00 hour
Target version:	1.9	Spent time:	0.00 hour
Bugzilla-Id:	3776		
Description			
On the LTER skin, the "logged in" link tries to take you to: <code>/knb/style/skins/lter/style/skins/lter/metacatlogin.jsp</code>			

History

#1 - 01/26/2009 01:13 PM - Michael Daigle

LTER Skin has a branding_extensions.js file that overrides branding.js. Added the contextURL to the insertLoginBox method so it appends the context url. This is the same as what was done already in branding.js.
