

InfoVeg - Bug #3790

Public/Private versions of Analysis database

01/29/2009 11:44 AM - Michael Lee

Status:	Resolved	Start date:	01/29/2009
Priority:	Normal	Due date:	
Assignee:	Michael Lee	% Done:	0%
Category:	AnalysisDB	Estimated time:	0.00 hour
Target version:	2009-June	Spent time:	0.00 hour
Bugzilla-Id:	3790		
Description			
We would like to create a public version of the analysis database that can be used by anyone, with all sensitive data appropriately handled. The timeline on this bug is not clear at present.

A private version of the analysis database should be created as well as a public version. There needs to be a form that any recipient of the private version signs to promise not to share it with any others and perhaps other constraints on its use. Perhaps the public database should have a similar agreement that people have to OK before using.

#2 - 11/23/2010 07:27 PM - Michael Lee

public version now created (optionally) in the post-process steps. Makes sure locations are fuzzed correctly, removes original coordinates and directions to plots for confidential plots, and for complete location embargo, removes state, county, etc.
