InfoVeg - Bug #3799

Create taxon collection list inside the Entry Tool

Description

Currently each project has a taxon collection excel spreadsheet that is generated by the person sorting through dead plants. It would be great if the entry tool could incorporate that into the tool itself, so that the list of taxa that were collected would be displayed (and sortable by plot, or other characteristic). Alternately, the entry tool could create the template of this information and port it into Excel.

If it remains in Access, then the updates that are made would automatically be part of the entry tool.

History

#1 - 02/04/2009 10:07 AM - Michael Lee

Need to track what has been collected (/, X) and subsequently updated (Z).

#2 - 02/13/2009 08:44 AM - Michael Lee

Include fit and confidence as optional fields so that someone can indicate whether the identification was made based on more of a guess or more solid evidence

#3 - 05/09/2009 07:33 AM - Michael Lee

I'll save comment #2 for an eventual upgrade directly to the archive db. For now, everything else is done.
