

Metacat - Bug #3812

Registry service will fail when registering new services

02/06/2009 03:07 PM - Michael Daigle

Status:	Resolved	Start date:	02/06/2009
Priority:	Immediate	Due date:

Target version:	1.9	Spent time:	0.00 hour
Bugzilla-Id:	3812		

Description

The xml used to register a new registry service will fail because the schema location does not exist and we validate new schemas now.

Need to add the registry schema to the build and add that schema to the xml_catalog table.

History

#1 - 02/10/2009 11:45 AM - Michael Daigle

Updated the MetacatImpl.xml build file in seek to include the ecogrid registry service xml schema files. Added the schema update sql to the 1.9 db update scripts.
