Target version:	1.9	Spent time:	0.00 hour
Bugzilla-Id:	3813		
Description			
If the tomcat user has a home directory, a file should get written to it in ~/.metacat/<application>_backup_location. that file is not getting written.

History

#1 - 02/11/2009 10:36 AM - Michael Daigle

Made sure a local file was written to the user's home directory. The file is at <user_home>/.<application_context>
