Description

Per Duane Costa:

In build.properties:

'indexPaths' is an important property, but its value is
very difficult to read and edit.

```
(i)  It would be helpful if the 'indexPaths' entries were alphabetized so
     that some kind of ordering is imposed. Right now it is
     a huge unordered list, so hunting down individual entries
     is like finding a needle in the haystack.

(ii) Is there some way to break up a property value over
     several lines? If so, it would be good to list the
     'indexPaths' entries one per line, instead of all
     on a single line several hundred characters long.
     This would make it easy to 'diff' a modified 'indexPaths'
     value with its original value.
```

History

#1 - 02/18/2009 04:36 PM - Michael Daigle

Changed the indexPaths property to be multi-line and alphabetized. Had to modify SortedProperties to read multi-line properties.
