<b>Target version:</b>	client-alpha3	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	3827		
<b>Description</b>			
When pages of a PDF have been marked as "Ignore Page" the parser still prompts the user to draw bounding boxes around the desired vector graphics.			

#### History

##### #1 - 02/18/2009 10:01 AM - ben leinfelder

Used doc10.pdf as a test - was asked to identify images on page 3 even after ignoring it

##### #2 - 02/24/2009 06:01 AM - Ryan McFall

This definitely shouldn't happen and needs to be fixed before the alpha-3 release.

##### #3 - 02/24/2009 07:05 AM - Ryan McFall

Should be fixed now. The page where ignoring pages and portions of text now checks the status of ignored pages and toggles next/finish button state based on whether any non-ignored pages contain vector images. The VectorImageRasterization page now looks at ignored pages and does not add them to the list as appropriate.
