

Metacat - Bug #3849

Some perl make files are not included in metacat war install

02/26/2009 03:15 PM - Michael Daigle

Status:	Resolved	Start date:	02/26/2009
Priority:	Normal	Due date:

Target version:	1.9	Spent time:	0.00 hour
Bugzilla-Id:	3849		

Description

The old perl "make install" would create a file named /usr/local/share/perl/5.8.8/auto/Metacat/autosplit.ix ...

This file is not included in the packaged version of metacat. There may be others. Not having autosplit.ix keeps register-dataset.cgi from running.

History

#1 - 03/02/2009 09:49 AM - Michael Daigle

Included autosplit.ix in the metacat distribution and added instructions for deploying that file on the server.
