Description

I'm having some problem in creating a package with kepler.

So from the build-area I'm executing:
ant package -Dsuite=kepler-trunk
then I unzip the package created in module/kepler-trunk.zip

When I try to run the jar I get the error reported below.

Luca

```
clem@lhc:~/projects/opal/kepler/kepler/modules/temp$ java jar-kepler-trunk.jar
run.perform()

History

#1 - 04/03/2009 04:49 PM - David Welker

This bug has been fixed for some time. I just tested the functionality of the package command with kepler-trunk, and it worked fine.
