Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	3854		

Description

We need to check fit to see if the numerical scale is reversed for some projects. Michael has compiled the sum of plots by project, fit, and confidence and the results are located here on bioark:

CVS_plotClassification\fitAnalysis_oldArcDB.xls

This document suggests that project 47 and 52 have fit reversed and all the other projects are OK.

History

#1 - 11/09/2009 01:15 PM - Michael Lee

The fit reversed issue has been resolved. Hooray!
