#### Description

Two different namespace prefixes have been used for the protocol module. These should be standardized.

```
[mob@horcon eml]$ grep 'pro:' *xsd
eml-methods.xsd:      <xs:element name="protocol" type="pro:ProtocolType">
[mob@horcon eml]$ grep 'prot:' *xsd
eml.xsd:      <xs:element name="protocol" type="prot:ProtocolType">
[mob@horcon eml]$
```

Note that when this is fixed: in eml-documentation.xsl, the template name="externalNamespaceLink" should be edited to remove the namespace prefix that was dropped.
