Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	3862		

Description

22-8-377 RHODMAX has 1% tree (mod R) and 5% (mod8) tree subsampling, but the original datasheets say 10% (R) and 50% mod 8.

This increases basal area in an undesirable manner.

History

#1 - 03/19/2009 09:10 AM - Michael Lee

fixed in version 1.1.22 of the archive db.

#2 - 03/27/2013 02:24 PM - Redmine Admin

Original Bugzilla ID was 3862
