Had you parsed an exam already?

What exam PDF was used originally?

Was the datapackage saved locally before selecting Documentation->Assessment Items...?

#2 - 03/10/2009 08:47 AM - ben leinfelder

from jay:

I guess it's happened when assessment data is not entered. After I went thru all the necessary steps like item parsing and importing assessment data, I didn't have any problem to run assessment items. But if I did not go complete steps, I had a trouble to run that menu.

I will try to test it again and let you know detail.

#3 - 04/24/2009 09:52 AM - ben leinfelder

Just tried:

New Data Package

Entered metadata

Saved

Launched parser

Parsed

Saved and closed

Saved

Exited morpho

Started morpho

Opened datapackage

Documentation->Assessment Items...

Parser launched with the Items I'd previously saved
