Description

When we retrieve the items from the database, it does now show image that is belonging to the item.

History

#1 - 03/09/2009 09:02 AM - ben leinfelder

There's currently not any mechanism that shows images on the web interface when viewing questions. They are being captured and we have references to those resources within the question metadata.
Also, the client does not show images after parsing is complete and the questions are being "re-edited" in the parser UI.
