<b>Description</b> I used the Documentation->Owners menu to add people from one dataset to another. I added people in a particular order that I want to be maintained. Morpho reordered the creators when it returns to the display mode. It also will not keep the order I return to the Documentation->Owners menu and specify an order with the 'move-up', 'move-down' buttons.

This just got fixed - it came up with our EVOS users and percolated to the top of the pile.
