<b>Target version:</b>	1.9.1	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	3886		
<b>Description</b>			
Metacat is using a lot of memory on production and seems to use many db connections. We should monitor and determine why.			
This ticket should be split into separate tickets if that makes sense.			

### History

#### #1 - 04/22/2009 10:24 AM - Michael Daigle

Made a fix to the way the FileUtil reads in files. Otherwise, the monitors made it look like tomcat was using more memory than it was, because the jvm will keep memory once it's allocated, even though gc is cleaning it up.
