

Kepler - Bug #3899

web service actor does not work through proxy

03/17/2009 12:19 PM - Chris Weed

Target version:	3.X.Y	Spent time:	0.00 hour
Bugzilla-Id:	3899		

**Description**

The run script does not set up the java proxy settings, so anything that needs to connect to the internet through http fails.

I had to edit kepler.sh to be the following:

```
java -Xmx512m -Xss5m -Dhttp.proxyHost=proxy -Dhttp.proxyPort=8080 -DKEPLER="$KEP" -DKEPLER_DOCS="$KEP"
-Djava.endorsed.dirs=./lib/jar/base-jars/apache -Djava.library.path=./lib org.kepler.loader.Kepler $*
```

However, this needs a more elegant solution, such as an environment variable, to allow the user to set this.

- I guess in windows you have to edit kepler-console.bat to do this also.
