<b>Description</b>			
<p>Need to finish integrating the SaveToDatabase functionality into mde. Currently, it is it's own menu item, and should be integrated with the save/save as dialog. Depends on resolving the accession number/file naming/public identifier issues. Need to factor out hardcoded configuration information from MetaDoc.saveDocumentToDatabase() and put into properties file. Need to manage user-feedback and error handling more thoroughly (currently only writes a success message to stdout).</p>

### History

#### #1 - 08/20/2000 08:49 PM - Matt Jones

Much of this integration is complete, but it still is its own menu item, and should be integrated with "Save as...".

Moved bug to dmanclient product.

#### #2 - 08/23/2000 11:22 AM - Dan Higgins

Described task has been completed

#### #3 - 03/27/2013 02:13 PM - Redmine Admin
