

Kepler - Bug #3904

devel tree should have a top level build.xml file and README.txt

03/18/2009 01:22 PM - Christopher Brooks

<b>Status:</b>	Resolved	<b>Start date:</b>	03/18/2009

<b>Target version:</b>	2.0.0	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	3904		
<b>Description</b> It would be very nice if the devel tree had a top level build.xml file so that cd kepler; ant run would work. I'm not sure if there is an easy way to do this though.			

History

#1 - 04/21/2009 11:13 AM - David Welker

The name "build" is a common directory name for a place where classes are built. The fear of using the term "build" for the "build-area" directory is that people might think that it would be permissible to delete the "build" directory. We are open to other alternatives to the "build-area" folder.
