Morpho - Bug #3919

the 'tab' key should behave consistently when through form fields

Description

A user filling out a form often uses the 'Tab' key to move to the next field. Sometimes in morpho, the tab key stays in the same box, and tabs to the right instead.
We saw this in two places: entity/description and attribute/definition. These are both string types, but their form fields are more than one line deep. To the best of my knowledge, Morpho tabbed as expected in one-line form fields.
