Kepler - Bug #3921

Exported KAR files do not correctly export private classes

03/31/2009 09:25 AM - Chad Berkley

Description

When exporting a KAR file, if the actor contains private classes, the private classes are not exported and an exception is thrown saying the PrivateClass is not visible. Need to look into the export paradigm to see if we can extract the private classes or whether we need to change the documentation to say that private classes are not available for export and possibly check to see if private classes exist at export time and give the user a warning.
