

FIRST - Bug #3926

Parsing/Extraction does not complete on doc56.pdf

03/31/2009 01:43 PM - Ryan McFall

Status:	Resolved	Start date:	03/31/2009
Priority:	Normal	Due date:	
Assignee:	Sandeep Namilikonda	% Done:	0%
Category:	parser	Estimated time:	0.00 hour
Target version:	client-prototype	Spent time:	0.00 hour
Bugzilla-Id:	3926		

Description

If the 4 raster images on doc10.pdf are identified and then the Finish button is clicked on, the extraction process begins but doesn't seem to complete. Clicking the Finish button a second time causes MainWindow to show up, but the ImagePane is empty.

It seems likely that an exception is being thrown but ignored, because if the images aren't identified, the parsing process completes and MainWindow is shown.

Sandeep, if you can at least identify what is happening here we can go from there.

I guess, you meant doc56.pdf and not doc10.pdf in your description of the bug although similar behavior is observed while parsing doc10.pdf. The reason seems to be the same as the one that causes Bug 3923.

With the code modifications I made for Bug 3923, you will notice that the parsing does complete now although the image association is flawed.

#2 - 05/11/2009 07:06 AM - Ryan McFall

Neither Sandeep nor I can reproduce this bug any more. I was on a different computer than the one I just checked on when I first reported it, so I'll try it there, but I'm going to mark it as WORKSFORME right now and assume it doesn't exist anymore. (Resubmit after fire)
