Target version:	SanParksRelease	Spent time:	0.00 hour
Bugzilla-Id:	3934		
Description			
Need to be able to edit the title of the report. I'd recommend a simple text area to do this, then set it in the ReportLayout objectmodel so that it can be used downstream when rendering/serializing.			

History

#1 - 04/21/2009 04:04 PM - debi staggs

Added split pane and inner report layout panel to the report designer. This allowed us to add a simple header and title at the top without affecting the way that the drag and drop panels work.

#2 - 04/23/2009 04:53 PM - ben leinfelder

The text I enter in the Text Field does not seem to be present in the ReportLayout object that I get from the WorkflowManager. Also: when I enter text in the field, then drag another item (HR) onto the report, my text disappears.

#3 - 05/19/2009 11:04 AM - debi staggs

We are now able to edit the title of the report, and it is added to the report model.
