Description

This is similar to handling an HR, but with user-entered static text. It is different than an Item's label in that this block of text is itself an item with a single value. Labels will be handled differently.

Go figure - this is working already. Let's hear it for generic Item handling!

#2 - 04/03/2009 03:22 PM - ben leinfelder

added to my "test" report and it works great.
