Description			
A table of contents showing the Items currently rendered in the Report Instance is now included in a separate panel in the Report Viewer view. This can be made better - perhaps so that it even scrolls to the appropriate place in the Report Instance when an item is selected.			

History

now updating the TOC when the report instance in the viewer is updated/refreshed

#2 - 08/05/2009 04:04 PM - ben leinfelder

this is extremely low-priority IMO
