

FIRST - Bug #3971

The original PDF document does not open when you reopen parsed items under Data Package interface

04/10/2009 10:35 AM - Jay Lee

Status:	New	Start date:	04/10/2009
Priority:	Normal	Due date:	
Assignee:	Ryan McFall	% Done:	0%
Category:	parser	Estimated time:	0.00 hour
Target version:	post-clientprototype	Spent time:	0.00 hour
Bugzilla-Id:	3971		
Description			
After completed the parsing and saved it to local, if i open data package again and open the assessment items, which is menu under documetation, the original documetation does not show up. is it natural or something that we need to fix it?

This is expected - we are not saving a reference to the PDF file and therefore are not displaying it when you come back to the items to edit them. In order to show the interface as it was shown to the user last, we'd need to essentially reparse the PDF so that all the images were made available as well.
This is - i believe - beyond the scope for the prototype.
