Target version:	client-prototype	Spent time:	0.00 hour
Bugzilla-Id:	3974		
<b>Description</b>			
for Exam1 from Fall 2004, it does not show the parsed items after finished the parsing. i parsed the exam 1 from 2004 without any problem. however, When I chose the menu " Save and Close", it does not save the parsed items. it does not close the parsing window.			

History

When I start morpho to access the data package corresponding to the parsed document, the meta-data is displayed fine but when I try to access the Assessment Items, the Assessment Importer window comes up BLANK with no items displayed!

This issue occurs on Fall2004-Exam1.pdf and Fall2005-Exam2.pdf.

While researching this bug, it came to my attention that there are cases in which the parser is generating QTI documents with multiple <item> elements.  
This is not how we had intended to use the QTI specification - even for multipart questions.  
When there are multiple <item> elements in the QTI, I get an error and the parser cannot reopen for editing the questions.  
See: private/samples/Fall05-Exam3.pdf  
Question 16 does this.
